Machop	3

(The exact precise amount of CP power per level may vary slightly due to Multipliers/Evolve.)

ALL CREDIT TO WWW.RANKEDBOOST.COM FOR THIS LIST

While CP also indicates the strength, two Pokemon of the same species and level can have nearly the same CP but have a wide IV margin. You just need to have a mobile browser. 6. All you need is to take a screenshot of your Pokemon's stats page then click on scan or import from the active Poke Genie app. Poke Genie Photo from PokeGenie.net Poke Genie is among the most popular and versatile Pokemon Go IV calculator apps, with more than 13 million downloads from the Google Play Store and App Store. The Pokemon Go IV calculator will then show you the S rating, depending on the IV values shown for the attack, defense, and stamina. S, SS, and SSS mean low, average, and high IVs, respectively. For example, a level 40 Lapras can have a CP of between 2,229 and 2,603. To summarize, IV is the better indicator of a Pokemon's true power compared to CP. Access the Pokemon's menu via the three-line icon. It offers optional in-app purchases. The IV checker can gauge both IV and CP. Furthermore, it can compute and predict IVs, tell you the best monsters to use against raid bosses, help you rename your Pokemon, and pick the best move sets. This is even if some violate Niantic's Terms and Conditions. You can explore the other icons for more functions. There is also a version of the GamePress Pokemon Go IV Calculator that focuses on PvP or Raid IVs. You can select it from the calculator type boxes on top of the webpage. The better Pikachu of the two will be the one with the higher or perfect IV stats. For example, the Eevee pictured to the right, this could either be a great Pokemon with almost full IVs, or it could be a fairly useless 29% Eevee. Pokemon IV vs CP: Which Is More Important? Poke Assistant is a free Pokemon Go IV calculator you can get from the App Store. Perfect IV Pokemon are very rare because players might catch thousands of weaker versions before getting one. Poke Genie is a Pokemon Go IV calculator or IV checker that is free for Android and iOS devices. This calculator works seamlessly with the in-game appraisal system, letting you directly enter the information that you get from the game. What's in the 'Advanced' section? Aside from taking a look at IVs, you can check the best attackers and defenders to use alongside the Pokemon or ideal move sets from the left side menu controls. Best Pokemon Go IV Calculator Apps As you might have already noticed, the Appraisal or IV checker feature does not give you specific numbers in the 0 to 15 range. You can expect the latter version of the Pokemon Go IV Calculator to factor in more variables and conditions to come up with even more accurate IV results. 1. 2. For instance, you have two Pikachu with 112-96-111 for the respective base stats mentioned above. Launch Calc IV then switch to your running Pokemon Game from the app itself. CP is the two-, three- or four-digit sum of a Pokemon's base stats and IVs, with level taken into account. For instance, whether the Pokemon is powered up, obtained by hatching an egg or a lucky catch. The Rise of the Pokemon Go IV Calculator just like how Pokemon Go hacks make gameplay better, knowing IVs helps players make the most of their strategies. It was originally designed for iPads but is now also available for iPhones. The Pokemon Rater by The Silph Road Screenshot from TheSilphRoad.com The Pokemon Rater tool on The Silph Road website is a safe and user-friendly Pokemon Go IV Calculator. Also, they can be used regardless if you are an Android or iOS user. The Pokemon Go IV calculator offers PvP IV because the power variable determines if a Pokemon is suitable for the game's Master or Ultra League. Perfect IVs will just be useless if your Pokemon sticks to the weak basic tricks. GoIV does not steal or store your account information and photos, so it is safe and would not get you banned. The popularity of Pokemon Go IV calculator apps pushed Niantic to add an in-game IV checker in a 2016 Pokemon Go update. Does this Eevee have good stats or not? This calculator simply attempts to calculate the IVs (what are Pokemon IVs?) for your Pokemon based on the information available. Additionally, it can provide you a list of the best Pokemon attackers for battles and the ideal move combinations to set. Moreover, it displays the expected CP when the Pokemon reaches maximum level. Consequently, someone who uses a Pokemon Go IV calculator that accesses the game's servers and accounts to get the information for evaluating IVs can get

banned. Step 2: Fill in the following values shown on the image: ACP BHP CDust required to Power Up the Pokémon Step 3: If you have the 'just caught' box as it will help narrow down the results. Also, you can access other functions, including the name generator, through the side menu. Download on App Store Pokémon Go IV Calculator App Alternatives In case you do not want to download and install a third-party app just to gauge IVs for Pokémon Go, there are reliable alternatives you can try. Pokémon Go IV calculator websites. This tool will then re-calculate based on your new data, and will help to further narrow down your results. Photo by Anton from Pixels Before we discuss the Pokémon Go IV calculator or Pokémon type calculator, you need to know first what individual values (IVs) are. The Pokémon Rater tool is on the easy mode by default and its advanced mode is coming soon, according to the website. One has 1200 CP while the other has 1280 CP. PokeRater is free for iPhones and iPads and is only available from the App Store. What is the 'Appraisal' section? Knowing the IVs will help you understand how strong a particular Pokémon can get once it reaches its highest level. Pokémon Go IV Calculator by GamePress Screenshot from GamePress.gg GamePress's calculator website for Pokémon Go is popular because of its simplicity and accuracy. This does not mean perfect IVs is the only ingredient for winning battles, though. IVs are a set of three randomly generated fixed figures, each being any number from 0 to 15. Take a screenshot like how you would do it regularly on your device then select it from the PokeRater app. If the range of possible combinations is too large, you can further refine with the Appraisal system. In fact, it only needs your Pokémon stats screenshot to provide you with an exact IV and not your account credentials. Let's say, they have hidden 7-7-7 and 15-15-15 IVs, respectively, or vice versa. The ban can happen in three strikes and be temporary or permanent. IV Go can be used by Android and iOS phone users. This Pokémon Go IV calculator will analyze the CP, HP, and Stardust power-up requirement to show you the hidden values and other relevant information afterward. 5. Like some IV checkers for Pokémon Go, you have to input the CP, HP, and Stardust requirements in their respective fields on the app's interface. You can only make an IV approximation based on how filled the three stat bars are on the Appraisal page. Also, pick Yes or No from the Powered drop-down menu to make the calculation more specific. As a result, many third-party Pokémon Go IV calculator or IV checker apps emerged through the years. Click the Pokémon option. Step 1: Choose your Pokémon that you want to use in the calculator. Each Pokemon has 3 separate IVs: these are hidden values between 0 and 15 for the Attack, Defense, and Stamina stats. Pokémon IV Calculator by Pokémon Go Info Screenshot from Pokemon gameinfo.io Pokémon Go Info's calculator webpage is an improved and more specific version of the game's Appraisal feature. To elaborate, you can upload 20 or more screenshots at once for the IV checker to evaluate. Step 4: Click 'Calculate'. It has been improved since 2019 to include a graphical presentation. One of them has an IV set of 7-8-5 while the other comes with 15-15-15. Your Pokemon should have a strong move set to maximize attack and defense. Not all Pokémon are equal: two max-level Pokémon can have different IVs, resulting in one which will be more powerful than the others. 3. In fact, they most likely have a great difference in hidden stats that you can only gauge through a Pokémon Go IV calculator. In fact, you'll find on the website a similar bar graph to the one from Pokémon Go. The only difference is there are actual 0 to 15 IVs indicated, depending on how you fill the bars. GoIV Photo by Johan Swanberg from Google Play Store GoIV works similarly to the previously discussed Pokémon Go IV calculator because it overlays its controls on the game. Tap the Main Menu icon from your game's Map View. The IV checker offers in-app purchases. The Pokémon Go IV Calculator gives you the exact IVs once you hit the Calculate button. This is true even if both are of the same species. However, it is exclusive only for Android devices. The Pokémon IV Calculator by Pokemon Go Info has instructions on the website if you need more information. Download on Google Play Store Download on App Store 2. It is for players who want to get IVs in one go. It can do more things beyond being a Pokémon Go IV calculator. You just have to input the Pokémon's name, CP, HP, and the amount of Stardust required to level it up. Moreover, it supports PvP IV analysis besides regular IV identification. Poke Assistant will give you two or three possible IV sets depending on whether the Pokémon is powered or not. 4. Poke Assistant Photo by Aiping Zeng from App Store Poke Assistant lives up to its name because you will find it as an essential companion app. This will usually help you significantly narrow down your results. To help you pick one, we've rounded up the best Pokémon Go IV calculator apps you can download for iOS or Android. For example, the slider can be dragged to move the point on the CP arc to indicate the value. You won't need to provide game account access to the webpage. Once in the game, long press on the overlaid Calcy IV button then the camera icon to take a screenshot of your Pokémon's appraisal page. This is a further way in which you can narrow down the results, but at the cost of powering up your Pokémon. If you're still getting a range of results and want to know what your exact IVs are, you can use this feature. PokeRater Photo by PokeRater from Twitter PokeRater is also among the best Pokémon Go IV calculator apps that would not get you banned. The calculator will run and give you the possible IV combinations for your Pokémon below. Also, it may offer in-app purchases. On first use of the IV checker app, you must input your trainer level and team name, grant permission for overlay and screen recording, and test the screenshot function on any Pokémon for app calibration. Calcy IV Photo by Calcy IV from Facebook Calcy IV is another widely-used Pokémon Go IV calculator, particularly for players using Android devices. Select the specific Pokémon you want to appraise. The listed IV checker webpages below are trusted by many players worldwide. Moreover, the in-game Pokémon Go IV calculator cannot provide you lineup management features like in Pokémon Home and other relevant information, including stat predictions and ideal buffs to use. Furthermore, each IV checker for Pokémon Go listed below is used by many players and will most likely not get you banned from the game. To summarize, the webpage wants you to copy how the bars from the game look like then give you a better IV estimate. Furthermore, it is free to download with optional in-app purchases. To explain, its interface is pretty basic yet functional. The Pokémon Go IV calculator does not ask for your account details, so you would not be banned from the game. Download on Google Play Store Download on App Store 7. With just CP information available, you might be missing out on the Pokémon that has the biggest growth potential among others of the same species. To use this feature, enter the stats as normal, but then power up your Pokémon one time, and enter the new stats in this advanced section. Moreover, the power variables and instructions are explained briefly on the page. On the other hand, the two power variables and a Pokémon Go IV calculator would not matter that much for you if you are playing Pokémon Go just to catch 'em all rather than to win it all against fellow trainers. As multiple IVs can give the same CP and HP values for a Pokémon, sometimes the range given can be quite large. They are the hidden added values to the base attack, defense, and stamina or HP stats that are uniform across similar species of Pokémon. GoIV is a Pokémon Go IV calculator that is open-source and completely free. Download on App Store 6. You can simply tick the icon or box to indicate specific conditions of the Pokémon. To elaborate, the website does not need account credentials, and it has slider controls for Pokémon data so you do not have to type the specific values. These values determine how powerful a Pokemon will be at its maximum level. The battle-related results you get are based on hundreds of simulations, so it is quite precise. PokeMeter Photo by PokeMeter from Facebook If you are looking for an all-around Pokémon type calculator for iOS, PokeMeter is the app to go. The logic behind this is that the latter league has a team CP cap unlike the former, so it will be harder for you to meet the limit if your lineup has perfect IVs. The app does not require you to provide your Pokémon Go account credentials and works as an overlay on the game, so it is safe. Download on Google Play Store 4. This means that in the worst case, you could end up with a Lapras which is only 85% as powerful as it could be! You caught two Pikachu in Pokémon Go, the world's most popular AR mobile game. To elaborate, a 15-15-15 IV set is ideal for Master League while a 0-15-15 is better in Ultra League. The feature is called Appraisal. Hit the Get IV button afterward. All you have to do is to input the Pokémon type, CP, Stamina or HP, and amount of Stardust required for leveling up. Wait for your Gym Leader to appear onscreen. Download on App Store 5. You can do this several times if you are still getting multiple results. The appraisal system is a feature on Pokémon Go that gives you information on your Pokémon, helping you to know how good your Pokémon is. For example, you have two Level 20 Pokémon of the same species. Click the Calculate button after information completion. Download on Google Play Store 3. Below are the steps on how to use the Pokémon Go IV calculator feature: 1. Each IV calculator available online is unique because of the differences in features offered, but many are available as apps. Hit the clickable Appraise option. While it is also screenshot-based like other Pokémon Go IV calculator apps, it can do batch processing. How to use the Pokémon Go IV calculator you ask? As a result, you now have the dilemma of which to keep and let go. You might be thinking that any will do, but hold on a second and do not convert that Pikachu yet to candies because no two Pokémon are alike. IV Go Photo by OrangeFish from Google Play Store When it comes to simplicity, IV Go tops the list of Pokémon Go IV calculator apps. The Pokémon Go IV calculator can show you the IV, possible power-up status per level, and predicted post-evolution CP afterward. You also have to choose the Pokemon you are checking from the drop-down menu and input the value on the CP field. To prioritize IVs over Combat Points (CP) or vice versa has been a debate in Pokémon Go strategy, so you should also understand the second power variable to get a concrete answer. The Pokémon Go IV calculator can be downloaded for free on the Google Play Store and App Store. The IV Go calculation process is also easy. That being said, IVs are a great differentiator for Pokémon and could be your winning factor in Player Versus Player (PvP) battles. These are why you and many Pokémon Go players might still prefer a third-party Pokémon Go IV calculator. The IV checker also records the Pokemon CP and the level it sees on the screen. Additionally, it has a history page for all the past Pokémon scanned, just like other top-tier Pokémon Go IV calculator apps mentioned. Before, Appraisal is just your Pokemon Gym Leader Candela, Blanche, or Spark hinting that a Pokémon is good, mediocre, or bad. The Pokemon Go IV calculator will show you PvP IV results in an instant. PokeMeter is a Pokémon Go IV calculator exclusive to iPhones. Best Pokémon Go IV Calculator What Is Pokémon Go IV? Furthermore, it's pretty easy to use.
